

# Potassium Sulfate Crystallization

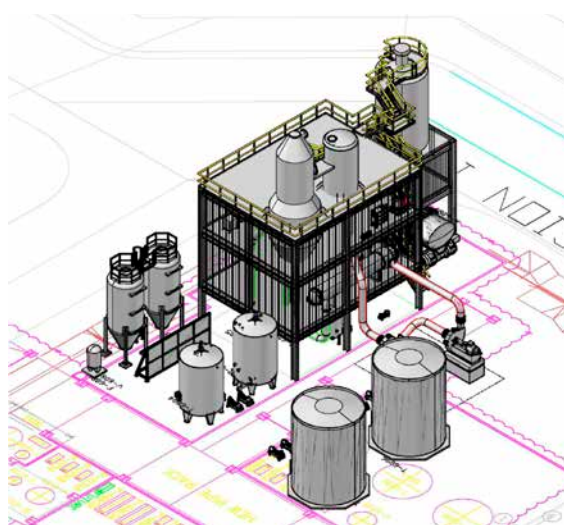

$K_2SO_4$

**IFC<sup>®</sup>**  
Technology

France Evaporation's exclusive IFC<sup>®</sup> process technology achieves superior crystallization results for numerous industrial salts.

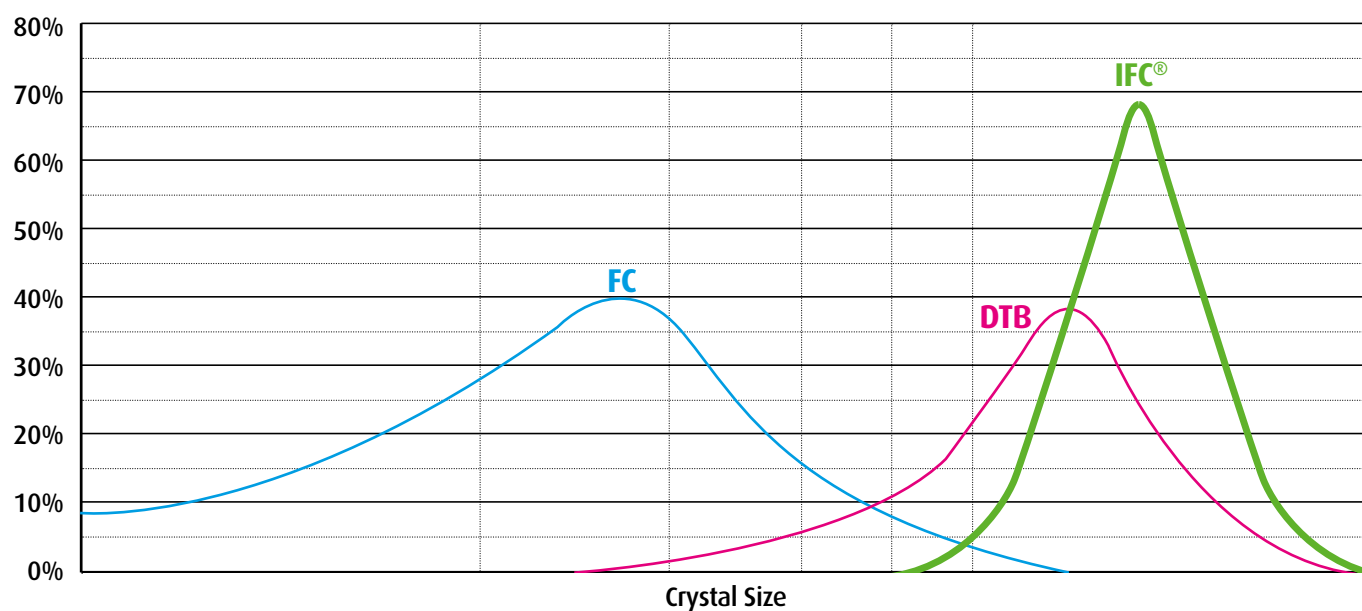

Potassium Sulfate producers can benefit from this technology to enhance product quality and raise operational profitability.

- Higher medium size (D50)
- Narrower granular repartition (CV)
- No fines
- Easier drying
- Enhanced energy efficiency
- Adjustable crystal size

## PROVEN SUPERIOR QUALITY CRYSTALLIZATION

IFC<sup>®</sup> yields bigger crystals and guarantees a much narrower size distribution than traditional Forced Circulation (FC) or DTB crystallization processes.

Zone Industrielle A de Seclin, rue René Cauche - F-59139 Noyelles-les-Seclin
